Homeowner,

The Village of Western Springs is evaluating stormwater drainage issues throughout the southeast section of the Springdale subdivision, with an initial focus on Franklin and Howard Avenue. A public open house has been scheduled for residents of Western Springs and homeowners of adjacent communities within the project area to share specific concerns they have regarding stormwater drainage or flooding on or near their property.

The Village has retained the services of Christopher B. Burke Engineering to assist in evaluating existing conditions and develop alternatives to address identified deficiencies. Input received will be compiled to assist the Village plan and prioritize future drainage improvement projects. Details for the public open house can be found below:

**Location: Village Hall, 740 Hillgrove Avenue**

**Room: Board Room**

**Date: Tuesday, March 31<sup>st</sup>**

**Time: 6:30PM-8:00PM**

Residents may arrive at any time during the open house to share their concerns regarding stormwater drainage or flooding. Village staff and its consulting engineers will be available to listen and document any concerns. Maps will also be available to assist residents with explaining their concerns.

In addition to the Open House, the Village invites all residents who have concerns regarding stormwater drainage or flooding to complete an online survey. Residents will have until Friday, April 10, 2020 to complete the survey. The survey can be found at the following link: [www.surveymonkey.com/r/SpringdaleDrainage](http://www.surveymonkey.com/r/SpringdaleDrainage).

If you have questions regarding the Open House, please contact Matthew Supert at 708-246-1800 x 205. If you are unable to attend the open house, you may send any comments or concerns you have to [msupert@wsprings.com](mailto:msupert@wsprings.com). Additional information is available on the project web page at [www.wsprings.com/SpringdaleDrainage](http://www.wsprings.com/SpringdaleDrainage).
