Dear Resident,

VILLAGE CLERK
Edward Tymick

This letter is to notify you that the Central Avenue Reconstruction and Storm Water Improvements project general contractor, Berger Excavating, will be performing sanitary sewer improvements on Central Avenue. The sanitary sewer main is being replaced at four isolated areas along Central. These improvements are anticipated to begin as early as **Tuesday November 15th** and continue throughout the week.

VILLAGE MANAGER
Ellen Baer

The sewer main replacement work will impact several homes' sewer service lines (see map on back). When the sewer work is occurring in front of your home your sewer line will likely be out of service for that day. A project team member will knock on your door prior to the start of the outage and again when the sewer service is restored. While your sewer service line is out of service, please refrain from using large amounts of water (shower, bath, doing dishes, washing machine etc.). You may use your toilets as well as sinks to wash hands during the outage. If the Contractor is not working directly in front of your home, then your sewer service line is not currently impacted and the restrictions would not apply. The map on the back shows the approximate locations of the sewer work.

DEPUTY MANAGER
Casey Biernacki

Throughout this process we ask for your patience as Central Avenue will be reduced to one lane traffic during the work hours. These improvements may restrict driveway access within the sewer operation work zone. A project representative will let you know when this restriction will be impacting you.

DIRECTORS
Patrick Schramm
Matthew Supert
Brian Budds
Aleks Briedis
Michael Kelly
Jeff Koza
John Mastandona

All excavated areas will be fully backfilled with aggregate and roadway will be fully open at the end of each day. These aggregate patches are temporary and will be replaced with bituminous asphalt upon completion of the sanitary improvements.

We apologize for any inconvenience. For additional information please visit:

If you have any questions or concerns regarding this project, please feel free to contact the onsite Resident Engineer, Sean Ludwig with V3 Companies at 630-768-2151.

Thank you in advance for your cooperation.
